

# Clearingworks - Integrated Receivables

## Your Strategic Solution to Optimize Treasury Management

Businesses struggle with multiple systems, formats and compliance requirements just to receive payments from their customers. U.S. Dataworks, Inc. - developed Integrated Receivables to transform your existing treasury solutions into an Intelligent Learning system.

## The True Integrated Receivables Solution

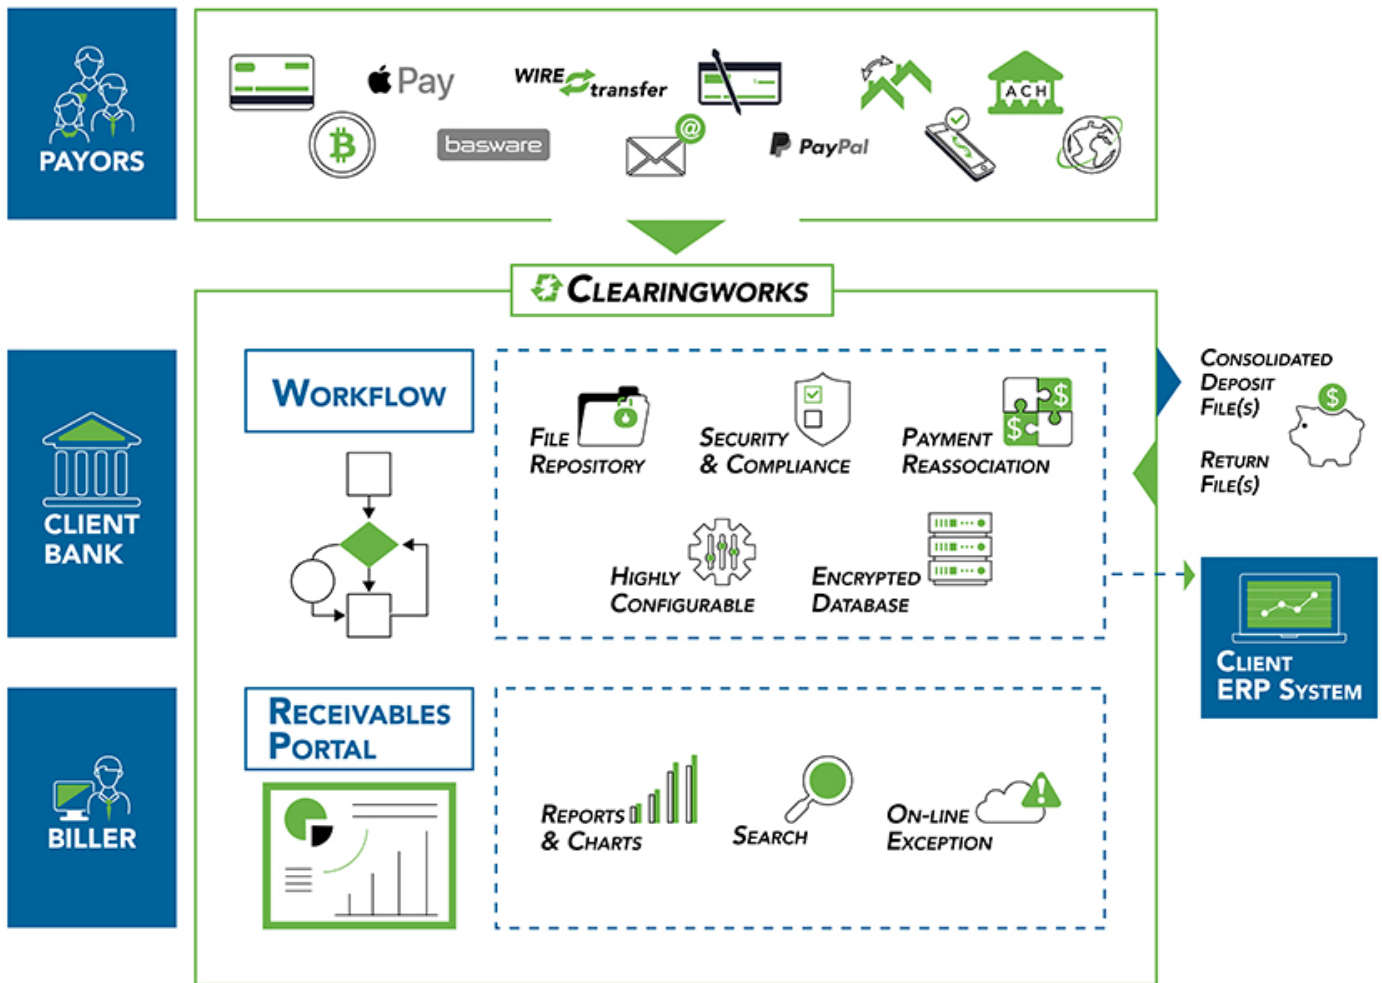

Integrated Receivables is one of the hottest topics in treasury services today – with good reason. With so much rapid development in this area, finding a true integrated receivables solution can be a challenge.

Clearingworks – Integrated Receivables delivers all components of a true integrated receivables solution:

- **Comprehensive invoice matching** to all payments received reduces manual effort while maintaining accuracy
- **Intelligent learning of cash application** process reduces setup time and automatically adapts to changing business processes
- **Real-time receivables dashboard** connects all business users to the latest receivables status at a global or customer level
- **Consolidate payment and related information**, including ACH, wires, checks, cards and faster payments to optimize any cash application processes
- **Long-term archive** of all payment activity simplifies payment research and compliance-related activities
